Homeschool First Fridays

Homeschool First Fridays is a series of environmental education programs developed especially for homeschoolers ages 4 to 12. These classes are a great way to get hands-on science and nature lessons, receive help on projects and research and network with other homeschooling families. Each two-hour program will consist of indoor and outdoor hands-on learning. Depending on the topic, students may observe live animals, collect aquatic creatures, take measurements of water quality, or play games. Students will be grouped by age to allow for age appropriate topic exploration. Parents with younger children will stay with the group; parents of older children have the option to stay and participate as mentors and teachers. Siblings younger than 3 are welcome but must be under the care of a parent/guardian at all times and should not distract other participants.
